Profile

Full-stack developer with two years of self-taught production work. I built most of Euphorium, a live campus commerce app, front end to back end, and ship fixes and features on Jaayorun, a live four-app delivery platform. Co-founder of Corbel. I also run manual WCAG accessibility audits, so I build interfaces that work with a keyboard and screen reader. Third-year Mechatronics Engineering student, graduating 2028.

Experience

Co-founder, Corbel | Lagos | 2026 – present

- Co-founded a company building secure software for African infrastructure and regulated industries.
- Leading product research for Coffer, an evidence vault for telecom field teams: site photo uploads on weak connections, checklist tracking, and closeout packs.
- Run outreach to contractors and document findings that shape the product.

Lead developer, Euphorium | Remote | 2026 – present

- Built most of a live social-commerce app for students, where each campus is its own marketplace.
- Shipped storefront profiles, a shared feed, direct messages, and search across sellers and products.
- Built tiered seller verification, with a step-by-step check for orders above ₦30,000.
- Stack: Next.js and Tailwind CSS front end; NestJS modular monolith on DigitalOcean; Supabase Postgres; Cloudflare for DNS, CDN and R2 image storage.

Developer, Jaayorun | Lagos | Aug 2026 – present

- Fix production bugs and ship features across four connected apps for vendors, customers, riders and staff.
- Work in a Dockerised Laravel/PHP codebase; taking over day-to-day ownership from the lead developer.

Webmaster and super admin, HDI | Contract | Aug 2026 – Jan 2027

- Run the website and portals for a halal certification body.
- Rewrote three live news articles, fixed broken media, and moved inline styles into one maintainable stylesheet.
- Maintain SEO on a static site that consumes a Node.js news API.

Freelance full-stack developer | Upwork, DataAnnotation | Jan 2026 – present

- Client web builds and bug fixes through Upwork, and AI model evaluation through DataAnnotation.
- Manual WCAG 2.1 AA accessibility audits with keyboard and NVDA testing, backed by a scanner I built with Playwright and axe-core.

Engineering placements | Lagos | 2026

- SIWES at KDS Engineering (Jul – Oct 2026): fabricated and wired industrial control panels (MCCBs, contactors, overload relays).
- AutoCAD drafting internship at an architecture firm.

Selected projects

Cardora, full-stack developer | React, Tailwind CSS, Node.js, Docker, Flutterwave, Paystack | Paused before launch

- WhatsApp-first greeting card and gifting platform for Nigeria.
- Built the React front end, including the animated envelope-to-card opening that recipients see.
- Worked on the Node.js backend: three subscription tiers, an in-app currency, and Flutterwave and Paystack payments.

PreventAI | React, FastAPI, Groq, Llama 3.1 | Cavista Hackathon 2026

- Built in 24 hours with team FOR_GERS: a preventive-health assistant that scores risk from a short health profile and returns plain-language advice.

Halal Meats | Next.js, React, Tailwind CSS | Live

- E-commerce store with checkout, payment webhooks, and an admin for managing stock in batches.

Student Performance Prediction System | Python, scikit-learn, React, Next.js | Commissioned

- Machine-learning system that flags students at risk of falling behind, delivered with a web interface.

Skills

- **Front end:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
- **Back end:** Node.js, Express, NestJS, Laravel/PHP, FastAPI, REST APIs
- **Data:** PostgreSQL (Supabase), MongoDB
- **Infrastructure:** Docker, Cloudflare, DigitalOcean, Vercel, Git and GitHub
- **Payments:** Flutterwave, Paystack, webhooks
- **Accessibility:** WCAG 2.1 AA, NVDA, keyboard testing, Playwright with axe-core
- **Machine learning:** Python, scikit-learn, LLM APIs (Groq, Llama 3.1)

Education and credentials

B.Eng. Mechatronics Engineering, Lagos State University of Science and Technology (LASUSTECH) | Expected 2028

- Minor in Computer Software and Media Applications.

BoyCode Bootcamp 5.0, Stellar Initiative | Jun 2026

- Fully funded residential programme in Lagos; now in its AI and automation cohort.

Certificates

- Anthropic: Claude 101
- Anthropic: AI Fluency
- DHS Trusted Tester (in progress)
