SKILLS

- Frontend
- React, Tailwind CSS, JavaScript, HTML/CSS
- Backend & Infrastructure
- Node.js, Docker, Laravel/PHP (collaborator-level)
- Content & Social
- Video Editing, Social Media Management
- Tools & Workflow
- Git/GitHub, Netlify, AI Prompt Engineering
- Design Systems
- Design Tokens / CSS Custom Properties

EDUCATION

LASUSTECH
B.Eng. Mechatronics Engineering
Third Year (In Progress)

CERTIFICATIONS

- Anthropic — Claude 101
- Anthropic — AI Fluency

PROFILE

Third-year Mechatronics Engineering student and independent full-stack-leaning developer with two years of hands-on experience building and shipping web platforms. Co-founder of Cardora, a digital card and moment-creation platform, where he leads frontend development in React and Tailwind CSS and contributes to the Node.js backend. Collaborates on a live, Docker-based Laravel delivery application as a full-stack contributor, owns Simplivide — a social media platform built and run end-to-end, from frontend to content — and has shipped frontends for real estate and service-based clients. Comfortable across the build cycle, from UI design through backend logic to deployment.

EXPERIENCE

- Jaayorun — Full-Stack Collaborator2026 – Present
- Live delivery application
- Fix bugs and ship features across a production Laravel/PHP delivery app spanning vendor, user, rider, and staff platforms
 - Work as a git collaborator with access to the full-stack repo, testing and running the application in a Dockerized local environment
- Architectural Firm — AutoCAD Intern2024
- Lagos, Nigeria
- Used AutoCAD collaboratively with the design team on architectural drafting tasks, contributing to shared project drawings

PROJECTS

- Cardora — Co-Founder & Full-Stack DeveloperLate 2025 – Present
- cardora.studio
- Built the React frontend for a digital card and moment-creation platform, co-founded alongside a backend developer, featuring an in-app currency system, three user tiers, and three card tiers with distinct visual treatments
 - Designed a cinematic, tier-based card-reveal experience — 3D envelope animation, staggered content reveal, and mouse-tilt interaction — using CSS custom properties as design tokens for visual consistency
 - Contribute to the Node.js backend and test locally in a Dockerized environment, applying Docker skills built through the Jaayorun project
- Simplivide — Owner, Video Editor & Social Media Manager2026
- Social media platform / content brand
- Own and run a social media platform posting interesting facts, handling video editing, content scheduling, and social media management end-to-end
 - Contributed frontend development work using React and Tailwind CSS as part of ongoing build efforts
- PrereleaseHub — Sole Frontend Developer2026
- Real estate / housing platform
- Built the complete frontend for a housing website end-to-end using React and Tailwind CSS
 - Owned UI structure, responsiveness, and component design as the only frontend developer on the project
- Halal-Meats — Sole Frontend Developer2026
- Service website for a halal butchering business
- Designed and built a client-facing website using React and Tailwind CSS
 - Translated client requirements into a clean, trust-building site layout suited to a local service business
